Dear Friend of the American Foundation for Saint George Hospital,

People from all over Lebanon go to Saint George Hospital in Beirut because they know they will receive outstanding medical care regardless of their means, religion or race by dedicated, compassionate healthcare professionals in a caring and warm environment. Patients at Saint George Hospital have said time and time again: “the staff makes us feel like family.”

I am Diane Rehm. For 37 years I hosted a national program on WAMU in Washington, DC, and distributed around the country and around the world by NPR. Last November, I had the honor to receive the “Make a Difference Award” at the annual gala of the American Foundation for Saint George Hospital in Washington, DC. I learned, then first-hand how the Foundation has been supporting the Hospital by helping patients in need, sending medications, life-support ambulances, state-of-the-art equipment for the neonatal and pediatric intensive care units and most recently starting a free program for the early detection of breast and women’s cancer for women from the distant corners of Lebanon.

With advances in medical care and technology, Saint George Hospital is committed to staying at the cutting edge to offer quality care to the sick and needy members of the community. Please help make this possible with your tax-deductible donation. Your generous contributions to the Foundation have helped make Saint George Hospital the leading regional health care provider that it is. Everyone at the Hospital is so grateful to you for helping to support a committed team of caregivers and the most vulnerable members of the community.

Please send your generous donation today. The Hospital’s caregivers and patients are counting on your support. Your caring gift will help make an immediate impact on urgently needed health services to the community.

With my best wishes and thanks for your support and generosity.

Sincerely,

Diane Rehm

PS: Save the date for the foundation’s 7th annual gala in Washington, DC on 3/3/2018
